6/30/2015

SAGE INSTRUMENTS

935AT End-of-Life Memorandum

Dear Sage Customers,

We regret to inform you that production and support for the 935AT Communications Test Set, after 16 years and a heritage going back 32 years, has come to an end. As you may know, the 935AT has been in maintenance mode for nearly five years and many of our component vendors have stopped support. We expect our limited inventory for repair to last to the end of Q2 2015 at which time all support will stopped with an exception for customers with prepaid maintenance contracts.

Over the last five years, we have had the opportunity to work with many of our customers to move them over to our newer test platforms (i.e. 960B, or 966R). But for those of you that have not started, Sage will be offering special project pricing to help with this transition.

Please feel free to call Sage Sales to discuss 935AT replacement options.

Sincerely,

Sage Sales
